Claimant's name

tom watts

Medco reference

26378

Compensator's details:

Name

Marshall Insurers

Compensator reference number

part testing

Your instruction is to examine and report upon the injuries sustained by tom watts following a RTA on 08/04/2022.

Injuries sustained by claimant:

Neck - Whiplash

These instructions are given on the basis that you understand and comply with the duties and obligations of experts under Part 35 of the Civil Procedure Rules. It is also necessary that you are a MedCo accredited expert and that you complete the report with the appropriate statement of truth as set out in the Ministry of Justice Practice Direction to Part 35 at paragraph 3.3. here: https://www.justice.gov.uk/courts/procedure-rules/civil/rules/part35/pd_part35

It is recommended that you complete the report in line with the existing 'Medical Report Form (RTA3)'.

It is important that where possible and appropriate, you provide a separate prognosis in relation to each of the injuries indicated by the claimant, initial details of which are copied above from the claimant's small claim notification form.

Also outline the following detail as appropriate:

1. The nature and extent of the initial injuries with details of immediate treatment given for each, both physical and psychological.
2. Subsequent progress with details of further recommended treatment. If possible, identify: what that treatment or therapy would be; when such treatment or therapy is likely to be appropriate or necessary; and the cost, or approximate cost, of such treatment or therapy (if known).
3. The nature and extent of any ongoing complaints and your summary of the claimant's condition and your view on the extent to which the claimant's ability to perform duties at work and enjoy usual social, recreational and domestic activities has been and/or is restricted.
4. The period over which the injuries have affected the claimant particularly justifying any absence from work.
5. Your prognosis, with particular reference to your estimate of the likely length of time over which the injuries will continue to affect the claimant's day to day work and leisure activities. If a final prognosis cannot yet be given please indicate when you anticipate that can be provided.
6. If a further report, at a subsequent stage, would be appropriate and when that would be.
7. Any other information which you believe is important to capture the full extent of the claimant's injuries sustained in the accident in question.

Advise if a report from another specialist, on any aspect of the injuries or subsequent management and treatment is required. If
